

Real-World Evidence (RWE) for Graduate Medical Education (GME):

Meet Healthcare's Top Tool for Training the Next Generation of Medical Professionals with RWE

Leveraging the largest federated data network in healthcare of over 300M de-identified patient records, Atropos Health equips tomorrow's top doctors with powerful tools to generate publication-grade observational research studies in record time. Our RWE reports allow GME organizations like yours to accelerate time-to-publication in top medical journals, uncover new grant opportunities, and gain recognition for new medical contributions.

Our Solution is Packaged for Your Performance

We offer complete end-to-end support for trainees and mentors, with several hands-on benefits targeted at meeting GME requirements and career developments, including:

- ✓ Self-directed training modules for residents
- ✓ Original and iterative study design with informatics support
- ✓ Post-study learning assessments & program evaluations
- ✓ Ready-to-submit trainee research for new grant opportunities

Unlock Answers, Evidence, and Outcomes – All in Record Time

Go from Question to RWE in Minutes

Query from over **300M** patients' data to receive transparent, expert answers in minutes, not hours or days.

2-min

query time vs. 150-minute SQL benchmark

Secure More Grants, Drive Cost Savings

Speed up production timelines and optimize resources and staff to recoup significant cost savings and submit for more grants.

\$3M

in annualized savings for a single AMC

Publish Rapidly in the Top Journals

Grow faculty and trainee knowledge while generating the highest-quality findings ready to be published in top-tier journals.

2-week

publication time vs. 10-month industry benchmark

Our clients are regularly featured in premier publications:

“

I liked actively querying a medical database in a **user-friendly way** – it made it **easy to ask questions** I was interested in. I also was glad to do this early in PGY1 because **I hope to use it throughout residency!**”

PGY-1 Resident

Recruit, retain, and empower your residents with a tool they'll love to learn from.

Results from recent students who've completed the GME program:

100%

awareness of evidence gap in medicine

92%

of residents agree or strongly agree they'd recommend the program
